1. ENGINE

* This guide is not intended to cover every conditions, however many of the more common possibilities are listed.

| Trouble | Service | Remark |
|---|---|-------------------------|
| Engine oil pressure lamp fails to go off immediately after the engine is started. | · Add the oil to the specified level. | |
| | · Replace the oil filter. | |
| | · Check oil leakage from the tube or the joint. | |
| Steam is emitted from the top part of the radiator (The pressure valve). Engine coolant temperature gauge indicates red range. | · Supply the cooling water and check leakage. | |
| | · Adjust fan belt tension. | |
| | · Wash out inside of cooling system. | |
| | · Clean or repair the radiator fin. | |
| | · Check the thermostat. | |
| | · Check the engine coolant temperature gauge. | |
| | Tighten the radiator cap firmly or replace the gasket of it. | |
| Engine does not start when the | · Add fuel | |
| starting motor is turned over. | · Repair where air is inhaled into fuel system. | |
| | · Check the injection pump or the nozzle. | |
| | In cold weather, check if fuel warmer system is working normal. | Refer to the pages 4-5. |
| | · Check the valve clearance. | |
| Exhaust gas is white or blue. | · Adjust to specified oil quantity. | |
| | · Replace with specified fuel. | |
| Exhaust gas occasionally turns | · Clean or replace the air cleaner element. | |
| black. | · Check the nozzle. | |
| | · Check engine compression pressure. | |
| | · Check or replace the turbocharger. | |
| Combustion noise occasionally | · Check the nozzle. | |
| changes to breathing sound. | · Check the injection pump. | |
| Unusual combustion noise or | · Check with specified fuel. | |
| mechanical noise. | · Check overheating. | |
| | · Check the muffler. | |
| | · Adjust valve clearance. | |

2. ELECTRICAL SYSTEM

| Trouble | Service | Remark |
|---|---|--------|
| Voltmeter fluctuates largely even with the engine running at a constant speed. Lamp does not glow brightly even when engine runs at high speed. Lamp flickers while engine runs. | Check for loose terminals open-circuit wiring. Adjust belt tension. | |
| Voltmeter does not fluctuate even with an increase in the engine speed. | Check the alternator. Inspect and repair wiring. | |
| Starting motor does not turn when starting switch is turned on. | Inspect and repair the wiring. Charge the battery. Check starting switch. Check battery relay switch. Place the gear selector lever in the neutral. | |
| Starting motor turns the engine sluggishly. | Charge the battery. Check the starting motor. | |
| Starting motor disengages before the engine starts up. | Check and repair the wiring. Charge the battery. | |
| Engine oil pressure lamp does not light up when engine is stationary (When the starting switch is in ON position). | Check the lamp. Check the oil pressure switch. | |
| Charge lamp does not light up when the engine is stationary. (When the starting switch is in ON position.) | Check the lamp. Check and repair the wiring. | |

3. POWER TRAIN SYSTEM

| Trouble | Service | Remark |
|--|---|--------|
| Engine is running but machine will not move. | · Release parking brake. | |
| | · Put gear selector lever in position properly. | |
| | · Add oil to transmission case to the specified level. | |
| Even at full throttle, machine moves slowly and lacks power. | · Add oil to transmission case to the specified level. | |
| | · Disassemble transmission strainer and clean. | |
| Transmission oil overheats. | Add oil to transmission case to the specified level or drain oil. | |
| | · Use a suitable gear speed. | |
| | Reduce time using torque converter at stall speed. Check engine. | |
| Abnormal noise is produced. | · Add oil to transmission case to the specified level. | |
| | · Add oil to axle case to the specified level. | |
| Brake does not work when pedal | · Raise hydraulic oil pressure to specified level. | |
| is depressed. | · Add brake oil. | |
| | · Bleed hydraulic oil from brake system. | |
| Brake drags or stay when applied. | · Clean breather and bleed air from brake system. | |
| Brake slips. | · Raise hydraulic oil pressure to the specified level. | |
| Brake does not work properly. | · Adjust linkage. | |
| | · Clean brake pad. | |
| | · Replace spring in hydraulic oil cylinder. | |
| | · Adjust or replace brake pad. | |
| Steering wheel is heavy. | · Repair or replace the pump. | |
| | · Repair, clean and reset the relief valve. | |
| | Coat a grease to connections and bearings of steering gear. | |
| | · Check the mounting of the steering column. | |
| Steering wheel turning by itself. | · Replace leaf springs. | |
| Slow steering. | · Clean spool and sleeve. | |
| | · Replace leaf springs. | |
| Impossible to turn the steering wheel into neutral position. | Check the monitor. | |
| | · Check and repair the wiring. | |

4. HYDRAULIC SYSTEM

| Trouble | Service | Remark |
|--|--|--------|
| Bucket lacks lifting power. Bucket lifting speed is slow. | Check the hydraulic oil level and add if necessary. Replace filter in hydraulic tank. | |
| Bubbles in oil. | Replace with specified oil. Add oil if needed. | |
| Oil pressure is too low. | Bleed air from oil line. Add oil and bleed air. | |
| Cylinder vibrates when operating. | · Add oil. | |
