## **1. CAB DEVICES**

1) The ergonomically designed console box and suspension type seat provide the operator with comfort.

#### 2) ELECTRONIC MONITOR SYSTEM

- (1) The centralized electronic monitor system allows the status and conditions of the machine to be monitored at a glance.
- (2) It is equipped with a safety warning system for early detection of machine malfunction.

75793CD01

## 2. CLUSTER

### 1) STRUCTURE

The cluster consists of gauges, lamps and LCD as shown below, to warn the operator in case of abnormal machine operation or conditions for the appropriate operation and inspection.

- · Gauges : Indicate operating status of the machine.
- $\cdot\,$  Warning lamps : Indicate abnormality of the machine.
- Pilot lamps : Indicate operating status of the machine.
- · LCD : Indicates selected the driving speed and direction.
- \* The cluster installed on this machine does not entirely guarantee the condition of the machine. Daily inspection should be performed according to chapter 6, MAINTENANCE.
- \* When the cluster provides a warning immediately check the problem, and perform the required action.

75793CD02

### 2) GAUGE

#### (1) Speedometer

- ① The speedometer displays the speed of machine in mph and km/h.
- The unit (km/h or mph) can be set by the display set up menu of the monitor and selected unit is displayed.
   Refer to page 3-23.

## (2) Fuel gauge

- ① This gauge indicates the amount of fuel in the fuel tank.
- ② Fill the fuel when the indicator moves red range or Blamp blinks in red, refuel as soon as possible to avoid running out of fuel.
- If the gauge indicates below red range even though the machine is on the normal condition, check the electric device as that can be caused by the poor connection of electricity or sensor.

### (3) Engine coolant temperature gauge

- ① This gauge indicates the temperature of coolant.
  - White range : 40~104°C (104~219°F)
  - Red range : Above 104°C (219°F)
- 2 If the indicator is in the red range or 2 lamp blinks in red, turn OFF the engine and check the radiator and engine.

### (4) Transmission oil temperature gauge

- ① This gauge indicates the temperature of transmission oil.
  - White range : 40~107°C (104~225°F)
  - Red range : Above 107°C (225°F)
- ② If the indicator is in the red range or amp blinks in red, it means the transmission is overheated. Be careful that the indicator does not move into the red range.

### (5) Hyd oil temperature gauge

#### (6) Battery volt meter

- $\ensuremath{\textcircled{}}$  This gauge indicates the temperature of hydraulic oil.
  - White range : 40~105°C (104~221°F)
  - Red range : Above 105°C (221°F)
- ② If the indicator is in the red range or 🖾 🗍 lamp blinks in red, reduce the load on the system.
- ③ If the gauge stays in the red range, stop the machine and check the cause of the problem.
- ① This gauge indicates the voltage in the charging system when the engine is running.
- ② If the indicator is below 24V, it means that the electricity is being discharged. If the indicator is above 30V, an unusually high voltage may damage the alternator. Check the charging system in both cases.

### 3) WARNING LAMPS

#### (1) Emergency warning lamp

- ① This warning lamp blinks and the buzzer sounds when comunication error occur between monitor and MCU.
- ② When this warning lamp blinks, machine must be checked and service immediately.

### (2) Engine overheat warning lamp

- ① This lamp is turned ON when the temperature of coolant is over the normal temperature (106°C, 223°F).
- ② Check the cooling system when the lamp is ON.

### (3) Transmission oil temperature warning lamp

- ① This lamp informs the operator that transmission oil is above the specified temperature.
- ② When this lamp lights up during operation, stop the engine and check the machine.

## (4) Hydraulic oil temperature warning lamp

- ① This warning lamp operates and the buzzer sounds when the temperature of hydraulic oil is over 105°C (221°F).
- ② Check the hydraulic oil level when the lamp is turned ON.
- ③ Check for debris between oil cooler and radiator.

### (5) Fuel level warning lamp

① This warning lamp lights ON when the fuel level is low. Refuel the machine as soon as possible.

#### (6) Transmission error warning lamp

- ① This lamp lights ON and the LCD display show the error codes when an error occurs in the transmission.
- ② Immediately pull the machine to a convenient stop. Stop the engine. Investigate the cause.
- \* Consult a HYUNDAI dealer to investigate the cause.
- $\ast\,$  Do not operate until the cause has been corrected.

#### (7) Air cleaner warning lamp

- ① This lamp lights ON when the filter of air cleaner is clogged.
- ② Check the filter and clean or replace it when the lamp is ON.

#### (8) Engine oil pressure warning lamp

- ① This lamp is comes ON after starting the engine because of the low engine oil pressure.
- ② If the lamp comes ON during engine operation, shut OFF engine immediately. Check engine oil level.

## (9) Steering warning lamp

#### 1) Primary

This lamp indicates that the primary steering has failed. When the indicator comes on and the action alarm sounds, steer the machine immediately to a convenient location and stop the machine. Stop the engine and investigate the cause.

\* Do not operate the machine until the cause has been corrected.

#### ② Emergency

This lamp indicates the emergency steering system is active.

- \* Immediately pull the machine to a convenient stop and stop the engine.
- \* The emergency steering system can be manually tested. Refer to page 3-28.

### (10) Battery charging warning lamp

- ① This lamp is ON when key ON, it is turned OFF after starting the engine.
- ② Check the battery charging circuit when this lamp comes ON, during engine operation.

#### (11) Brake fail warning lamp

- ① The lamp lights ON when the oil pressure of service brake drops below the normal range.
- ② When the lamp is ON, stop the engine and check for its cause.
- \* Do not operate until any problems are corrected.

## 4) PILOT LAMPS

75793CD10

#### (1) Warming up pilot lamp

- (1) This lamp is turned ON when the coolant temperature is below  $30^{\circ}C$  (86°F).
- ② The automatic warming up is cancelled when the engine coolant temperature is above 30°C, or when 10 minutes have passed since starting the engine.

#### (2) Seat belt pilot lamp

① This lamp lights ON for the first five seconds after starting the engine.

#### (3) Mirror defrost pilot lamp

① This lamp comes ON when mirror defrost switch is pressed.

## (4) High beam pilot lamp

## (5) Preheat pilot lamp

- $\ensuremath{\textcircled{}}$  This lamp works when the illuminating direction is upward.
- ② This lamp comes ON when the dimmer switch is operated, e.g., when passing another vehicle.

- This lamp lights ON when start switch is turned clockwise to the ON position. Light will turn off after approximately 5~45 seconds, depending on engine temperature, indicating that preheating is completed.
- ② When the lamp goes out the operator should start cranking the engine.
- \* Refer to page 4-5.

### (6) Parking brake pilot lamp

- $(\ensuremath{\textcircled{}})$  When the parking brake is actuated, the lamp lights ON.
- \* Check the lamp is OFF before driving.

### (7) Maintenance pilot lamp

- ① This lamp will be ON when the consuming parts are needed to change or replace. It means that the change or replacement interval of the consuming parts remains below 30 hours.
- <sup>(2)</sup> Check the message in maintenance information of the monitor menu. Also, this lamp lights ON for 3 minutes when the start switch is ON position.

### (8) Clutch cut off pilot lamp

- ① This lamp lights ON when the clutch cut off mode switch is positioned L, M, H.
- \* Refer to page 3-29.

## (9) FNR select pilot lamp (option)

- ① The lamp comes ON when FNR select button on the optional FNR remote control lever is pressed.
- \* Refer to page 3-33.

## (10) Joystick steering pilot lamp (option)

- This lamp lights ON when joystick steering is activated. It is then possible to steer the machine and select gears from the armrest to the left of the operator's seat.
- \* Refer to page 3-35.

## (11) Ride control pilot lamp (option)

## ① Auto ride control

This lamp lights ON when push in the bottom of the ride control switch (auto position).

\* Refer to page 3-28.

## ② Manual ride control

This lamp lights ON when push in the top of the ride control switch (manual position)

\* Refer to page 3-28.

### (12) Fan reverse pilot lamp

① This lamp lights ON when the fan control switch is pressed.
\* Refer to page 3-27.

#### (13) Fuel warmer pilot lamp

#### 5) LCD

- ① This lamp is turned ON when the coolant temperature is below 10°C (50°F) or the hydraulic oil temperature 20°C (68°F).
- <sup>(2)</sup> The automatic fuel warming is cancelled when the engine coolant temperature is above 60°C and the hydraulic oil temperature is above 45°C since the start switch was ON position.
- (1) The LCD can be used with the gear selector. It indicates speed and driving direction.

No	Symbol	Meaning	Remark	
	_, , , □		Forward, reverse, neutral	
1	1, 2, 3, 4	Actual gear display	Actual gear	
	Р		Parking brake mode active	
2	►, ► Forward, reverse		Automatic mode	
3		Gear range display	Automatic mode	

## **3. MONITOR**

- $\cdot$  The monitor is adjustable.
- Vertical : 14°
- Horizontal : 30°

- 1) BUTTONS
- (1) Menu button

- $\ensuremath{\textcircled{}}$  D Main display to main menu, main menu to main display.
- ② AEB cancel button in AEB setting.
- (2) Left move button

① Move in menu (left, up).

(3) Camera / ESC button

- ① Enter rear camera mode in main display.
- ② Cancel button except in main display (move previous menu).

## (4) Right move/Buzzer stop button

① Move in menu (right, down).

② Buzzer stop.

- ① Select menu (enter).
- ② AEB cancel button in AEB setting.

## 2) MAIN MENU

- 3 Wiper speed
- 7 Transmission mode
- 4 Actual gear

1

2

- 8 Engine rpm
- \* Display type can be changed by operator. See page 3-23.

## (1) Structure

No	Main menu	Sub menu	Description
1	MODE 75793CD12	Engine speed Kick down Wiper speed Fan-auto mode AEB Speed meter Sensor calibration	Engine warming up, Engine speed Mode 1 (down/up), Mode 2 (down only) 4 steps Interval and time setting AEB setting Pulse setting Boom/bucket angle, Boom pressure calibration
2	MONITORING 75793CD13	Fault code Machine monitoring Record monitoring	Active, logged fault (machine, TCU, ECU, SCU) Hyd temp, Battery, Coolant temp T/M oil temp, Weighing system Hour meter, ODO meter
3	MANAGEMENT 75793CD14	Machine security Maintenance Machine information Service contact Service	ESL system setting, Change password Replacement, Change interval (oils and filters) Version, Status Service contact S/W download
4	DISPLAY SET UP	Clock Display Unit Rear camera Language	Clock Brightness setting (Manual/Automatic) Type display (A or B type) Temp (°F/°C), Distance (km/mile), Pressure (bar, Mpa, kgf/m², psi) Reverse mode, Active camera, Display order 18 languages

## (2) Mode

#### ① Engine speed MODE MODE MODE Engine Speed Engine Speed Engine Speed Engine Warming-Un **Engine Warming-Up** 0 Engine Speed EN Auto Mode OF 75793CD16 75793CD16B 75793CD16A Set low idling speed MODE MODE Engine Speed Engine Speed Engine Warming-Up **Engine Speed** 800 rpm 75793CD16C 75793CD16D 2 Kick down MODE MODE 1/2 Engine Setting **Cick Dow** κ MODE 1 :DOWN/UP uto Mode 2 DOWN ONL 75793CD17 Speed Meter Setting 75793CD17A

- Mode 1 (down/up) : Press kick down button once, shift down and press button again, shift up.
- · Mode 2 (down only) : Press kick down button every time, shift to lower gear respectively.
- \* Refer to page 3-31.

#### ③ Wiper speed

- · Select reverse interval or reverse time.
- · Set reverse interval (30~300 min) or reverse time (30~300 sec).
- \* Default : Interval (60 min), time (120 sec)
- \* Refer to page 3-27, fan control switch.

#### **⑤ AEB**

Actual gear window

- · AEB mode controls the disk clearance of the transmission, automatically.
- · To start AEB setting, press ♂ and hold for 3 seconds.
- · To cancel AEB setting, press MENU, ₪/ESC or ♂.
- · If "OK" in actual gear window, press MENU, I/ESC or & to complete AEB setting.
- · Display during AEB mode

Symbol	Meaning
ST	Start AEB
K1~K4, KV, KR	Calibrating clutch K1~K4, KV or KR respectively
OK*	Calibration for all clutches finished
Spanner and Kx*	Kx couldn't be calibrated, AEB finished
ΔE	Engine speed too low - Raise engine speed
∇E	Engine speed too high - Lower engine speed
ΔT	Transmission oil temperature too low - Heat up transmission
VT	Transmission oil temperature too high - Cool down transmission
FO*	Output speed not zero
FN*	Shift lever not in neutral position
FP*	Parking brake not applied

\* : Transmission stays in neutral, you have to restart the TCU (ignition off/on).

#### **(6)** Speed meter

- · Press 𝔄 and hold for 3 seconds.
- To change the pulse value, press  $\blacktriangleleft$  or  $\blacktriangleright/\mathfrak{M}$ .
- To change the position, press  $\mathbf{\mathfrak{S}}$ .
- \* Only for the serviceperson.

#### **⑦** Sensor calibration

- Boom / Bucket angle calibration
- CPU get sensing signal from boom link angle and bell crank angle and calculate bucket cylinder stroke and boom link position angle from ground real time basis.
- Boom link angle position and bucket cylinder stroke is set by boom kickout & bucket leveler set switch in cab.
- Individual setting position is done by lever solenoid (detent, release operation).
- Angle sensor calibration is basically carried out before delivery of the machine.

When angle sensor is replaced or actual value is different compared to setting value, this function can be done.

- Bucket cylinder stroke Boom link angle Under stroke Bell crank angle Bell crank angle Doom kickout & bucket leveler set switch
- The calibration must be carried out as follows :
- ① Lower the boom at maximum low position and select *C* (bucket must be max tilting position).
- (2) Raise boom at maximum high position and select  ${\bf C}$ .
- ③ Position boom at -5° and select  $\bigcirc$ .
- 4 Retract bucket cylinder length (to minimum position) at -5° boom position and select C.
- ⑤ Extend bucket cylinder length (to maximum position) at -5° boom position and select ♂.
- ⑥ In case above steps are carried normally, "complete" message is shown. Then angle sensor calibration is finished after selecting 𝚱.
- \* Boom down / boom up / bucket position setting : Refer to page 4-22.

#### · Boom pressure calibration

- It is used when bucket weight is changed or measured weight is inaccurate.
- The calibration must be carried out as follows :
- Increase hydraulic temperature (about 30 ~ 60°C).
- ② Select "Boom-pressure calibration".
- ③ Place the boom at low position with bucket completely rolled in (max tilting position).
- ④ Press 健.
- ⑤ Raise boom to maximum position. Boom up must be finished before stepping advance in "display A".
- ⑥ If it show "Succeed" message in a moment, press ♂.
- \* Raise hydraulic temperature enough when checking work load / boom pressure sensor calibration (recommendation : about 30 ~ 60°C).
- \* Check if pressure sensor or angle sensor is in normal condition for accurate work load algorism or pressure sensor calibration (pressure sensors at boom cylinder head area and rod area, boom link angle sensor (CD-80), bell crank angle sensor (CD-81).
- \* Sensor error message during pressure sensor calibration : sensor need to be checked.

## (3) Monitoring

2

· Monitor the fault code of the Machine/ECU/TCU/SCU.

\* Not define will be indicated in case of that there's no fault.

#### 2 Machine monitoring

MONITORING		MONITOR	MONITORING		MONITORING		
Ċ.	Fault Cada	Mach. Monitoring		Mach. Monitoring			
	Mach, Monitoring	HYD. Temp	75°C	HYD. Temp	75 °C		
$\sim$	Monitoring History	Battery	27.8 V 🔅	Battery	0N		
۵		ENG. Coolant Temp	75°C 🍵	ENG. Cor	0FF 75°C 🔹		
P		T/M Oil Temp	75 °C 🕥	T/M Oil Temp	/5 °C 🔹		
	75793CD24						
			7709S3CD24A		7709S3CD24B		

- · Monitor the status of the machine.
- $\cdot\,$  To check the item in main display, choose it and press  ${\ensuremath{\mathfrak{C}}}$  .
- · The right icon shows ON/OFF status.

#### \* Priority in the main display

- · The priority of the weighing system is the highest.
- If selected the weighing system, the other items are not available.
- To check the other items, the weighing system should not be selected.

The example of the weighing system

#### \* Weighing system

#### **1. PRINCIPLE**

- 1) The weight indication in bucket is calculated by measuring boom position and boom pressure.
  - The weight is '0.0 ton' when the boom is placed at below -15°.
  - (2) The weight is indicated when the boom is placed at the range (-5°→15°).
  - (3) The weight is calculated when the boom is placed at above -5° and boom is lowered below -15° after dumping operation.

In order to re check weight, go to the (2) after changing boom position (below -15°).

(The other way is to select  $\bigcirc$  of monitor and go to (2) in case boom is placed at above -5°).

2) Dump operation : It is checked by bucket cylinder's stroke change (below 250 mm).

## 2. MONITOR DISPLAY

1) When pressing work load button for over 2 seconds, the weight is shown sequence basis. (main display  $1 \rightarrow 2 \rightarrow 3 \rightarrow 4 \rightarrow 1$ )

 Default accumulated value at memory A, B, C when pressing work load button for over 2 seconds (default : 0.0 ton).

#### **③ Record monitoring**

- $\cdot$  Hour meter
- Total : total hour meter

To show the item in the main display, select "ON" and press *G* (this item could not reset).

- Latest : the latest hour meter after reset.

To show the item in the main display, select "ON" and press ♂.

To reset the latest hour meter, select "initializing" and press  $\mathfrak{G}$ .

75793CD25D

### · ODO meter

- Total : total ODO meter

- Latest : the latest ODO meter after reset.

To show the item in the main display, select "ON" and press  $\mathbf{G}^{I}$ .

To reset the latest odometer, select "initializing" and press  $\boldsymbol{\mathfrak{S}}$ .

75793CD25J

## (4) Management

#### ① Machine security

#### · ESL system setting

- ESL : Engine Starting Limit
- ESL mode is designed to be a theft deterrent or will prevent the unauthorized operation of the machine.
- If the ESL mode was selected Enable, the password will be required when the start switch is turned ON.
- Disable : Not used ESL function
  - Enable : The password is required whenever the operator start engine.
  - Interval mode : The password is required when the operator start engine first. But the operator can restart the engine within the interval time without inputting the password.

The interval time can be set maximum 2 davs.

### Interval setting

- If set interval setting to 5 minutes, ESL system is activated after 5 minutes.

Therefore, the password does not need to restart engine within 5 minutes.

75793CD26D

75793CD26K

#### · Change password

- Input 5 to 10 digits and press \*.

Enter the current password.

Enter the new password.

The new password is stored in the MCU.

Enter the new password again.

#### ② Maintenance

• Alarm (🔅) : Warning

Replacement : The elapsed time will be reset to zero.

Change cycle : The change or replace cycle can be changed in the unit of 50 hours.

- To change cycle, press  $\triangleleft$  or  $\blacktriangleright/\mathfrak{M}$ .
- · Change or replace interval

No	Item	Interval
1	Engine oil	500
2	Hydraulic oil	* <sup>1</sup> 2000 * <sup>2</sup> 5000
3	Pilot line filter element	1000
4	Hydraulic oil return filter	1000
5	Engine oil filter	500
6	Fuel filter element	500
7	Fuel pre-filter	500
8	Hydraulic tank air breather	250
9	Radiator coolant	2000
10	Transmission oil and filter	1000
11	Axle oil (front and rear)	1500

\*1 : Conventional hydraulic oil

 $\star^2$ : Hyundai genuine long life hydraulic oil

## 4. SWITCHES

1) STARTING SWITCH

(1) There are three positions, OFF, ON and START.

- $\cdot \bigcirc$  (OFF) : None of electrical circuits activate.
- (ON) : All the systems of machine operate.
- $\cdot \bigcirc$  (START) : Use when starting the engine.

Release key immediately after starting.

- If you turn ON the starting switch in cold weather, the fuel warmer is automatically operated to heat the fuel by sensing the coolant temperature. Start the engine in 1~2 minutes after turning ON the starting switch. More time may take according to ambient temperature.
- Key must be in the ON position with engine running maintain electrical and hydraulic function and prevent serious machine damage.

### 2) HAZARD SWITCH

#### 3) PILOT CUT OFF SWITCH

- (1) Use for parking, or roading the machine.
- (2) Both turn signal lights will flash simultaneously.
  - \* If the switch is left ON for a long time, the battery may be discharged.
- (1) When the switch is pressed to OFF position, the hydraulic pilot line will be cut off, so the work equipment will not operate.
- (2) Press the ON position in order to unlock the hydraulic pilot line.
- \* This switch can be set to ON or OFF position only when the safety button is pulled to the unlock position.

### 4) PARKING BRAKE SWITCH

- (1) When the switch is pressed to ON position, the parking brake will start to operate and the cluster warning lamp will comes ON.
- (2) Press the release position in order to disengage the parking brake.
- When operating the gear selector lever, be sure to release the parking brake. If the machine is operated with the parking brake engaged, the brake will overheat and may cause the brake system to go out of order.
- \* This switch can be set to ON or Release position only when the safety button is pulled to the unlock position.

#### 5) MAIN LIGHT SWITCH

- (1) This switch use to operates the clearance lamp and head light by two step.
  - First step : Clearance lamp and cluster illumination lamp comes ON. Also, all indicator lamp of switches come ON.
  - Second step : Head light comes ON.

#### 6) WORK LAMP SWITCH

- (1) This switch use to operates the front and rear work lamps by two step.
  - First step : Front work lamp located on the cab comes ON.
  - Second step : Rear work lamp located on the cowl comes ON.

## 7) REAR WIPER AND WASHER SWITCH

## (1) The switch use to operates the rear wiper and washer by two step.

- First step : The rear wiper operates.
- Second step : The washer liquid is sprayed and the rear wiper is operated only while pressing. If release the switch, return to the first step position.

## 8) FAN CONTROL SWITCH

- (1) This switch use to control the cooling fan.
- (2) This switch has three positions.
  - AUTO : The fan automatically work in reverse according to set up interval and time.
    - \* Refer to page 3-14.
  - **OFF** : Only forward rotation is possible.
  - MANUAL : The fan rotates reverse only while pressing this position. If release the switch, return to the OFF position.
- (3) On pressing the switch, the indicator lamp is turned ON.

## 9) DETENT SELECT SWITCH

- (1) This switch is used to select the detent functions.
- (2) This switch has three positions.
  - $\cdot$  A : Detent functions are not operated.
  - $\cdot$  **B** : Only boom detent function is operated.
  - $\cdot$  C : Boom and bucket detent functions are operated.

## 10) MIRROR DEFROST SWITCH (option)

- (1) If the mirror defrost switch is pressed in condition of key ON, it operates for 15 minutes. After 15 minutes, the defrost function stops automatically.
- (2) One more pressing the switch in operation also stops defrost function.
- (3) On pressing the switch, the indicator lamp is turned ON.

### 11) BEACON SWITCH (option)

(1) This switch turns ON the rotary light on the cab.

### 12) RIDE CONTROL SWITCH (option)

### (1) AUTO

Press in the bottom of the ride control switch in order to turn on the automatic ride control. The automatic ride control automatically turns on when the travel speed exceeds a preset speed of approximately 7 km/h. The automatic ride control automatically shuts off during low speed travel (below 7 km/h).

#### (2) MANUAL

Press in the top of the ride control switch in order to turn on the system for ride control regardless speed. The ride control will smooth the ride of the machine during travel.

#### (3) OFF

Press the ride control switch to the middle position in order to turn off the system for the ride control.

## 13) EMERGENCY TEST SWITCH (option)

- (1) The emergency steering system can be manually tested. Push the switch in order to determine if the emergency steering and the emergency steering lamp are functional.
- (2) When the switch is pressed, the emergency steering pump motor will run. The emergency steering lamp will light. If the emergency steering lamp does not light, do not operate the machine.

### 14) ATTACHMENT LOCK SWITCH (option)

- (1) Press this switch in order to engage the quick coupler pins.
- (2) If this switch is pressed for 5 seconds, the quick coupler pins move in the engaged position.

If the switch is released, the quick coupler pins will remain in the engaged position.

\* This switch can be pressed only when the safety button is pulled to the unlock position.

### \* Check for engagement as followings.

- ① Put down pressure on the attachment.
- ② Back up the machine and make sure that there is no movement between the quick coupler and attachment.

## 15) ATTACHMENT UNLOCK SWITCH (option)

- (1) Press this switch in order to disengage the quick coupler pins.
- (2) If this switch is pressed for 5 seconds, the quick coupler pins move in the disengaged position.

If the switch is released, the quick coupler pins will remain in the disengaged position. (Machine serial No. : ~#0683)

If the switch is released, the quick coupler pins will slowly extend to the engaged/locked position. (Machine serial No. : #0684~)

\* This switch can be pressed only when the safety button is pulled to the unlock position.

### 16) BOOM KICK OUT AND BUCKET LEVELER SET SWITCH

- (1) Press this switch in order to set the boom kickout and bucket leverer.
- \* Refer to page 4-22.

#### **17) ENGINE MODE SWITCH**

- (1) The operator can adjust the machine's performance with this dial switch.
  - P (Power) : Maximum power output for hard digging operation or hill climb.
  - S (Standard) : General digging and loading operation.
  - E (Econo) : Maximum fuel efficiency for general loading.

### 18) CLUTCH CUT OFF MODE SWITCH

- (1) Four modes are available for operator's preference and job condition.
  - · OFF : The clutch cut off function is disable.
  - · L (Low) : The clutch is disengaged early for short-distance and rapid loading.
  - M (Medium) : The clutch is disengaged normally for general digging and loading operation.
  - H (High) : The clutch is disengaged lately for slope ground.
- (2) The clutch cut off functions of the left brake pedal depend on the position of the left brake pedal and the position of the clutch cut off mode switch.

Positions for clutch cut off function				
Clutch cut off mode switch L M H				
Left brake pedal	L, M, H	M, H	Н	

### 19) TRANSMISSION SHIFT MODE SWITCH

- (1) Four modes are available for operator's preference and job condition.
  - MAN (Manual) : Machine is operated by selected gear on lever.
  - AL (Auto Light) : Automatic shifting point is fast for long-distance transportation and fuel efficiency.
  - AN (Auto Normal) : Automatic shifting point is normal without automatic kick-down to 1st gear for general digging and loading operation.
  - AH (Auto Heavy) : Automatic shifting point is normal with automatic kick-down to 1st gear for more powerful operation.

#### 20) HORN BUTTON

## (1) If you press the button on the top of the multifunction switch, the horn will sound.

### 21) CAB LAMP SWITCH

- (1) This switch turns ON the cab room lamp.
- 1 DOOR

The lamp comes ON when the door is opened. When the door is closed the lamp is OFF.

2 ON

This switch is used to turn the lamp ON or OFF.

### 22) WORKLOAD BUTTON

- (1) Press the button in order to set "Total" display at zero.
- \* See page 3-16, weighing system.

### 23) USB SOCKET (machine serial No. : -#0539)

- (1) MP3 files are played when a USB device is connected to the USB port.
- (2) In addition, the AUX port enables headphone and other devices.

### 24) KICK DOWN SWITCH

#### (1) Manual mode

It is effective 2nd speed to 1st speed only and recover to 2nd speed quickly when push the switch one more time.

#### (2) Automatic mode

① Mode 1 (down/up)

It shifts down quickly from current gear to one step lower speed by pushing the switch and recover to current speed quickly when push the switch one more time.

#### ② Mode 2 (down)

It shifts down from current gear to one step lower speed when push the switch every time.

The kick down function is released in only 1st speed.

- \* Refer to page 3-13 for the kick down setting.
- \* The normal autoshift function continues after the kick down switch is released.

#### **25) MULTI FUNCTION SWITCH**

#### (1) Front wiper and washer switch

- 1 When the switch is in  ${\bf J}$  position, the wiper moves intermittently.
- 0 When placed in  $\ensuremath{\mathbbm I}$  or  $\ensuremath{\mathbbm I}$  position, the wiper moves continuously.
- ③ If you push the grip of the lever, washer liquid will be sprayed and the wiper will be activated 2-3 times.
- \* Check the quantity of washer liquid in the tank. If the level of the washer liquid is LOW, add the washer liquid (in cold, winter days) or water. The capacity of the tank is 1 liter.

#### (2) Dimmer switch

- ① This switch is used to turn the head lights direction.
- ② Switch positions
  - Up : To flash for passing
  - Middle : Head lights low beam ON
  - · Down : Head lights high beam ON
- ③ If you release the switch when it's in up position, the switch will return to middle.

#### (3) Turning switch

- ① This switch is used to warn or signal the turning direction of the machine to other vehicles or equipment.
- ② Push the lever up for turning left, pull the lever down for turning right.

# **5. CONTROL DEVICE**

75793CD28

### 1) REMOTE CONTROL LEVER

- (1) These joystick are used to control the boom and the bucket.
- (2) Refer to operation of working device in chapter 4 at page 4-9.

## 2) FNR REMOTE CONTROL LEVER (option)

- (1) This switch is used for froward and backward drive.
- \* Gear range can be selected by gear selector lever.

#### (2) Select button

- ① If the select button is pressed, the indication lamp on the cluster will be ON and this FNR switch will start to operate.
- When the engine is running, the machine is on standstill(0 speed), parking brake is released, gear selector lever is in the neutral position, you can use this function after pressing the select button.

#### (3) FNR switch

- · F : Forward drive
- · N : Neutral
- $\cdot$  R : Reverse drive
- If the upper side of this switch is pushed, the machine moves forward.
- 2 If the down side of this switch is pushed, the machine moves backward.
- ③ This function is automatically released when the engine is stopped, parking brake is ON or gear selector lever is out of neutral.
- (4) Kick down button : Refer to page 3-31.

## 3) GEAR SELECTOR LEVER

- (1) This lever is used for gear selection, forward 4 stages and reverse 3 stages.
- (2) If you push the gear selector lever, the machine moves forward, but if pull the gear selector lever, the machine moves backward.
- (3) If you turn the gear selector lever forward, the machine increases the speed, but if you turn the gear selector lever backward, the machine reduces the speed.

#### 4) ACCELERATOR PEDAL

- (1) This pedal controls the engine speed. The engine speed will increase in proportion to the degree of force applied to this pedal.
- (2) Unless this pedal is pressed, the machine will run at low idling.
#### 5) BRAKE PEDAL

# 6) STEERING WHEEL

- (1) Left brake pedal (service brake + clutch cut off function)
- ① If the pedal is pushed down, this will generate braking force and bring the machine to a stop.
- ② If the power train operation is to be cut off, set the clutch cut off mode switch to ON (L, M, H) and press the pedal.
- ▲ Even if the brake is applied while clutch cut off mode switch is OFF, power train will not cut off.
- \* Do not operate the machine with foot the brake pedal unnecessarily, or bring premature wear of brake disc.
- ③ Clutch cut off function : Refer to page 3-29.
- (2) Right brake pedal (service brake function only) This pedal functions as service brake only.
- (1) Two multi-motion cylinders in the center of the machine will operate the steering function.
- (2) If the steering wheel is turned to left, the machine will move to the left and turn it to the right, the machine will move to the right.

## 7) STEERING WHEEL LEVER

- (1) By pulling down the lever, the wheel is adjustable to tilt.  $\cdot$  Tilting : 40  $^{\circ}$
- (2) By pulling up the lever, the wheel is adjustable to telescope.
  - Telescoping : 80 mm

#### 8) JOYSTICK STEERING CONTROL LEVER (option)

- (1) The system has the following functions concentrated to a collapsible arm rest : steering, forward / reverse selection and kickdown function.
- (2) This means that during normal loading work, the operator does not need to touch the steering wheel.
- (3) The joystick steering pilot lamp on the cluster will be ON when the lever steering is activated.
- ▲ As a safety precaution, the joystick steering is functioned while pressing the steering ON button (C).
- ▲ When operating on a public road, the steering wheel should always be used and the joystick steering be disconnected. Also when operating at high speeds (above 20 km/h) on a work site, always use the steering wheel.

#### (4) Joystick (A)

① Activate the lever-controlled steering by pushing in the steering ON button (C).

The steering wheel works as usual, even if the joystick steering is activated.

#### (5) Forward/reverse selection button

- F : Forward drive
- N : Neutral
- R : Reverse drive
- ① To be able to operate the forward/reverse selection and kick-down button the system must first be activated using select button (B).
- \* The ordinary gear selector control should be in neutral.
- ② When this function is engaged, it is possible to operate the forward -reverse selection. If the ordinary gear selector control is activated at the same time as the joystick steering is activated, the ordinary gear selector control overrides any selection made by the joystick steering.

To reactivate the joystick steering, the ordinary gear selector control must first be moved to neutral and the system again be activated.

③ The FNR select pilot lamp ④ on the cluster will be ON when the forward/reverse selection is activated.

#### (6) Kick-down button : Refer to page 3-31.

# 6. AIR CONDITIONER AND HEATER

## ■ FULL AUTO AIR CONDITIONER AND HEATER

Full auto air conditioner and heater system automatically keeps the optimum condition in accordance with operator's temperature configuration sensing ambient and cabin inside temperature.

75793CD37

# 1) POWER OFF SWITCH

(1) This switch makes the system and the LCD OFF. Just before the power OFF, set values are stored.

#### (2) Default setting values

Function	Air conditioner	In/outlet	LCD	Temperature	Mode
Value	OFF	Inlet	OFF	Previous sw OFF	Previous sw OFF

# 2) AUTO SWITCH

- (1) Turn the starting switch to ON position, LCD lights ON. Auto air conditioner and heater system automatically keeps the optimum condition in accordance with operator's temperature configuration sensing ambient and cabin inside temperature.
- (2) This switch can restart system after system OFF.

# 3) AIR CONDITIONER SWITCH (compressor switch)

- (1) This switch turns the compressor and the LCD ON.
- (2) In accordance with the temperature sensed by duct (evaporator) sensor, compressor turns ON or OFF automatically.
- \* Air conditioner operates to remove vapor and drains water through a drain hose. Water can be sprayed into the cab in case that the drain cock at the ending point of drain hose has a problem.

In this case, exchange the drain cock.

## 4) FAN SPEED SWITCH

- (1) Fan speed is controlled automatically by setted temperature.
- (2) This switch controls fan speed manually.
  - $\cdot\,$  There are 8 up/down steps to control fan speed.
  - $\cdot\,$  The maximum step or the minimum step beeps 5 times.
- (3) This switch makes the system ON.

# 5) TEMPERATURE CONTROL SWITCH

- (1) Setting temperature indication
  - ① Type A : 17~32°C, scale : 1°C
  - ② Type B : Lo, 18~31°C, Hi, scale : 1°C

(2) Max cool and max warm beeps 5 times.

(3) The max cool or the max warm position operates as following table.

Temperature	Compressor	Fan speed	In/Outlet	Mode
Max cool	ON	Max (Hi)	Recirculation	Vent
Max warm	OFF	Max (Hi)	Fresh	Foot

- (4) Temperature unit can be changed between celsius (°C) and fahrenheit (°F)
- ① Default status (°C)
- ② Push Up/Down temperature control switch simultaneously more than 5 second displayed temperature unit change (°C → °F)

#### 6) MODE SWITCH

 Operating this switch, it beeps and displays symbol of each mode in order. (Human → Human/Rear → Human/Def → Def/Rear)

Mode switch		Human	Human/Rear	Human/Def	Def/Rear
		<b>ن</b> ر-	≖ ر-	<i>ل</i>	<u>س</u> ر*
	А			•	•
Outlet	В	•	•	•	
	С		•		•

- (2) When defroster switch operating, FRESH AIR/AIR RECIRCULA-TION switch turns to FRESH AIR mode and air conditioner switch turns ON.
- (3) When this switch ON, the system operates with previous configuration.

## 7) FRESH AIR/AIR RECIRCULATION SWITCH

- (1) It is possible to change the air-inlet method.
- Fresh air ( ) Inhaling air from the outside.
- \* Check out the fresh air filter periodically to keep a good efficiency.
- ② Air recirculation ( )
- It recycles the heated or cooled air to increase the energy efficiency.
- $\ast$  Change air occasionally when using recirculation for a long time.
- \* Check out the recirculation filter periodically to keep a good efficiency.

# 8) SELF DIAGNOSIS FUNCTION

## (1) Procedure

3607A3CD69

#### (2) Error check

- The corresponding error code flickers on the setup temperature display panel, the other symbol will turn OFF.
- · Error code flickers every 0.5 second.
- $\cdot\,$  If error code is more than two, each code flickers 2 times in sequence.
- · Error code

Error code	Description	Error code	Description
11	Cabin inside sensor	16	Mode actuator 1
12	Ambient sensor	17	Mode actuator 2
14	Duct (evaporator) sensor	18	Intake actuator
15	Temp actuator	-	-

#### (3) Fail safe function

Error description	Fail safe function		
Cabin inside sensor (11)	25°C alternate value control		
Ambient sensor (12)	20°C alternate value control		
Duct (evaporator) sensor (14)	1°C alternate value control		
Temp actuator (15)	If opening amount is 0 %, the alternate value is 0 %		
	If not, the alternate value is 100 %		
Mode actuator 1, 2 (16, 17)	The alternate value is Vent		

# 7. OTHERS

77093CD38

#### 1) CIGAR LIGHTER

- (1) This can be used when the engine starting switch is ON.
- (2) The lighter can be used when it springs out in a short while after being pressed down.
- \* Service socket

Use cigar lighter socket when you need emergency power. Do not use the lighter exceeding 24 V, 100 W.

# 2) SEAT

The seat is adjustable to fit the contours of the operator's body. It will reduce operator fatigue due to long work hours and enhance work efficiency.

#### (1) Forward/Backward adjustment

- Pull lever A to adjust seat forward or backward.
- ② The seat can be moved forward and backward over 210 mm (8 in) in 21 steps.
- (2) Reclining adjustment Pull lever D to adjust seat back rest.
- (3) Arm rest adjustment This can be adjusted by turning the handle F to right and left.
- (4) Weight adjustment (E) Adjusting handle to the operator's weight.
- (5) Heated seat switch (option) Press this switch in order to heat the seat.

## 3) 12V SOCKET (option)

(1) Utilize the power of 12 V as your need and do not exceed power of 12 V, 30 W.

#### 4) MASTER SWITCH

- (1) This switch is used to shut off the entire electrical system.
- (2) I : The battery remains connected to the electrical system.O : The battery is disconnected to the electrical system.
- Never turn the master switch to O (OFF) with the engine running. Engine and electrical system damage could result.

## 5) FUSE BOX

· Machine serial no. : -#0092

75793CD40

· Machine serial no. : #0093-

75793CD107

- (1) The fuses protect the electrical parts and wiring from burning out.
- (2) The fuse box cover indicates the capacity of each fuse and circuit it protects.
- \* Replace a fuse with another of the same capacity.
- A Before replacing a fuse, be sure to turn OFF the starting switch.

#### 6) MACHINE CONTROL UNIT (MCU)

(1) It consists of electronic parts and controls all lamps and buzzers on cluster in accordance with signals transmitted from the switches, the ECM, TCU, the engine and the hydraulic pressure sensors.

(2	) Three	LED	lamps	on the	e MCU	display	as below.
----	---------	-----	-------	--------	-------	---------	-----------

LED lamp	Trouble	Service		
G is turned ON	Normal	-		
G and R are turned ON	Trouble on MCU	Change the MCU		
G and Y are turned ON	Trouble on serial communication line	<ul> <li>Check if serial communication lines between controller and cluster are disconnected</li> </ul>		
Three LED are turned OFF	Trouble on MCU power	<ul> <li>Check if the input power wire (24V, GND) of controller is disconnected</li> <li>Check the fuse</li> </ul>		
G : areen. R : red. Y : vellow				

G: green, R∶rea,

# 7) TRANSMISSION CONTROL UNIT (TCU)

- (1) The control unit is shifting the required speeds fully-automatically under consideration of the following criteria.
  - · Gear selector lever position
  - · Driving speed
  - Load level

# 8) ENGINE CONTROL UNIT (ECU)

(1) The engine control unit (ECU) is the control center of the engine system.

# 9) REAR CAMERA (option)

- (1) The rear camera is available as a option.
- \* Refer to page 3-24.

#### 10) RADIO AND USB / PLAYER (Machine serial No. : -#0298)

3-44

#### RADIO AND USB PLAYER +BLUETOOTH (Machine serial No. : #0299-#0693)

#### GENERAL

#### (1) Power and volume button

#### ① Power ON/OFF button

Press power button to turn the unit ON or OFF shortly. When the power is ON, the previous mode (last memory) will appear.

#### ② Volume up / down control

Turn volume up / down button right to increase the volume level. The level will be shown in VOLUME xx on the LCD display. Turn it left to decrease the volume level. After 5 seconds of volume indication, display will return to the previous mode.

## (2) Sound function selection button (audio selection)

① This button is to adjust the sound. Each time you press power button shortly, LCD displays each mode as follows :

 $BASS \rightarrow TREBLE \rightarrow BAL \rightarrow BEEP \rightarrow LOUD \rightarrow VOLUME$ 

When this button is pressed, LCD display shows selected function for 5 seconds and then returns back to the previous mode. On selected function, level can be controlled by turning this button. The display will automatically return to normal indication in 5 seconds after the last adjustment is made or when another function is activated.

#### ② Bass control

To adjust the bass level, first select the bass mode by pressing the select button sel

The bass level will be shown on the LCD display from a minimum of BASS -10 to a maximum of BASS +10.

The display will automatically return to the normal indication in 5 seconds after the last adjustment or when another function is activated.

## ③ Treble control

To adjust the treble level, first select the treble mode by pressing the select button select button select button select button select button select button for the treble indication appears on the LCD display. Within 5 seconds of choosing the treble mode, turn power button right / left to adjust the treble level as desired.

The treble level will be shown on the LCD display from a minimum of TREBLE -10 to a maximum of TREBLE +10.

The display will automatically return to the normal indication in 5 seconds after the last adjustment or when another function is activated.

#### ④ Balance control

To adjust the left-right speaker balance, first select the balance mode by pressing the select button sel until the BAL indication appears on the LCD display.

Within 5 seconds of choosing the balance mode, turn power button right / left to adjust the balance as desired.

The balance position will be shown on the LCD display from BAL 10L (full left) to BAL 10R (full right).

When the volume level between the left and right speakers is equal, BAL L=R will be shown on the LCD display panel.

The display will automatically return to the normal indication in 5 seconds after the last adjustment or when another function is activated.

## 5 Beep control

The display will automatically return to the normal indication in 5 seconds after the last adjustment or when another function is activated.

Select BEEP ON when you wish to hear the BEEP sound whenever any function button is pressed.

Select BEEP 2ND when you wish to hear the BEEP sound whenever any tuner pre-set button and/or tune seek buttons are pressed for more than 3 seconds.

# 6 Loud control

When listening to music at low volume levels, this feature will boost the bass and treble response.

This action will compensate for the reduction in bass and treble performance experienced at low volume.

To select the loudness feature, press select button set until LOUD ON or LOUD OFF is displayed, then turn power button left or right to activate or deactivate loudness.

## (3) Mode button

0 Press mode button to select RADIO / USB / AUX.

## (4) Audio mute button

① Press mute button momentarily to mute volume and MUTE mark will blink on the LCD display.

Press the button again to return to the mode in use before the mute mode was activated.

# RADIO

#### (1) AM / FM / LW band selector

# ① Each time this button is pressed, the radio button is changed. Each time this button is pressed, LCD displays each band as follows :

$$FM1 \rightarrow FM2 \rightarrow FM3 \rightarrow AM \rightarrow LW$$

\* LW band is only available for Europe.

# (2) Up / down tuning

To manually select a radio station, press the up tuning & down tuning button for longer than 3 seconds.

The radio frequency will move up or down step by step each time you press button.

#### (3) Station pre-set button

1	2
3	4
5	6

Pressing these buttons shortly will recall your favorite pre-set radio stations.

To store your favorite stations into any of the 6 pre-set memories in each band (AM/FM/LW), use the following procedure :

- a. Turn the radio ON and select the desired band.
- b. Select the first station to be pre-set using the manual up/ down or automatic seek tuning control button.
- c. Press the chosen pre-set button to store your selected station into and continue to hold it in. The beep sound will be momentarily heard and the pre-set number will apear on the LCD display indicating that the station is now set into that pre-set memory position and can be recalled at any time, by pressing that pre-set button.

# (4) Pre-set scan (PS) / Best station memory (BSM) button

#### ① Pre-set scan (PS)

Press BSM button shortly to scan the 6 pre-set station stored the memories on each band (AM/FM/LW).

The unit will stop at each pre-set station (the pre-set number on the LCD display will flash during pre-set scan operation) and remain on the selected frequency. Press the button momentarily again to remain on the station currently being heard.

#### ② Best station memory (BSM)

Pressing BSM button for longer than 2 seconds will activate the BSM tuning feature which will automatically scan and enter each station into memory.

If you have already set the pre-set memories to your favorite stations, activating the BSM tuning feature will erase those stations and enter the new ones.

This BSM feature is most useful when traveling in a new area where you are not familiar with the local stations.

# USB PLAYER

#### (1) USB function

There are two ways to play mp3 files in a USB device : using USB socket in the cab and the USB/ AUX cable connected to the front side of the player.

## · Use of USB socket

- ① Connect a USB device, which saves mp3 files, to USB socket in the cabin.
- ② If a USB device has not been connected, MP3 files are automatically played when you insert it into the USB port.
- ③ If a USB device has connected, MP3 files are played when you press mode for USB.

· Use of USB/AUX cable (option)

75793CD81

- ① Connect the USB/AUX cable to the player in order to play MP3 files in a USB device.
- ② If a USB device has not been connected, MP3 files are automatically played when you insert it into the cable.
- ③ If a USB device has connected, MP3 files are played when you press mode for USB.

#### (2) File selection & cue / review button

## 1 File selection function

This button is used to select file up / down. Each time the forward file select  $\ll$  is pressed, file number is increased.

Each time the backward file select  $\backsim$  is pressed, file number is decreased.

#### 2 Cue / review functions

High-speed audible search of file on a USB can be made by this button (the cue and review functions).

Press and hold the cue button  $\ll$  to advance rapidly in the forward direction or the review button  $\gg$  to advance rapidly in the backward direction.

#### (3) MP3 directory / file searching

① The power button is used to select a particular directory and file.

Press and hold for more than 3 seconds while playing MP3 file.

Turn right / left the power button to search the directory. Press the button when you find the wanted directory.

For example, the directory search generally changes in two methods depending on the order of writing as follows.

· Method 1 : ROOT  $\rightarrow$  Dir01  $\rightarrow$  Dir02  $\rightarrow$  Dir03  $\rightarrow$  Dir04  $\rightarrow$  Dir05  $\rightarrow$  Dir06  $\rightarrow$  Dir07

 $\cdot \text{ Method 2 : ROOT} \rightarrow \text{Dir01} \rightarrow \text{Dir02} \rightarrow \text{Dir03} \rightarrow \text{Dir06} \rightarrow \text{Dir04} \rightarrow \text{Dir07}$ 

If you want to search the file in the located directory, turn right / left the power button consecutively. Press the button when you find the wanted file. The unit will then play the selected file. For instance, the file search changes in Dir01 as follows.

$$File01 \rightarrow File02 \rightarrow File03 \rightarrow File04$$

\* MP3 direction / file configuration

#### (4) ID3 v2 display

① Disp button is used to change the display information.

While playing an MP3 file, you can change the file information shown on the LCD display.

Each time you press DISP (display), the display changes to show the following.

\* If the MP3 disc does not have any ID3 information, the display will show NO ID3 on LCD display.

#### (5) File scan (SCN)

① During USB play, press SCN button to play the first 10 seconds of each file on the whole file on the USB (SCN mark will appear on the LCD display).

When a desired file is reached, press the SCN button again to cancel the function.

The unit will then play the selected file.

In case of playing MP3 file, when the SCN (scan) button is pressed and held for longer than 2 seconds, the SCN mark will blink on the LCD display and all files in the selected directory will be introduced until the file scan mode is cancelled by pressing the SCN button again or by activating the random or repeat functions.

## (6) Repeat play selector (RPT)

① During USB play, press RPT button to play the selected file repeatedly (RPT will appear on the LCD display).

Play of the file will continue to repeat until this button is pressed again and the RPT disappears from the LCD display.

In case of playing MP3 file, when the RPT button is pressed and held longer than 2 seconds, the RPT mark will blink on the LCD display and play all files in the selected directory and will be repeated until the directory repeat mode is cancelled by pressing the repeat button again or by activating the scan or random functions (RPT mark will disappear from LCD display).

# (7) Random play selector (RDM)

① During USB play, press RDM button to play the files on the USB in a random shuffled order (RDM will appear on the LCD display). The file select function will also select file in the random order instead of the normal process.

The random play mode can be cancelled by this button again.

\* In case of MP3 file, when the random button is pressed and held longer than 2 seconds, the RDM mark will blink on the LCD display and play all files in directory randomly until the directory random mode is cancelled by pressing the random button again or by activating the scan or repeat functions (RDM mark will disappear from LCD display).

#### (8) Directory down

## (9) Directory up

located each time you press this button.

① Press D- button briefly while playing MP3. The previous directory is

- (1) Press D+ button briefly while playing MP3. The next directory is located each time you press this button.
- \* If the MP3 file does not have a directory, the unit play MP3 at 10-file intervals.
- \* If any MP3 file does not exist in USB, this button can not operate.

## AUX PLAYER

- (1) Aux function
- · Use of USB socket

- ① If you want to listen to music of a external audio device, connect a external audio device into the USB port.
- 2 Press mode button to change a current mode for AUX. If audio file of audio device is playing, you can listen to music through speaker.

## Use of USB/AUX cable (option)

- ① If you want to listen to music of a external audio device, connect a external audio device through USB/AUX cable.
- 2 Press mode button to change a current mode for AUX. If audio file of audio device is playing, you can listen to music through speaker.

## ■ BLUETOOTH (Machine serial No. : #0299-#0693)

#### (1) Introduce

The bluetooth radio supports bluetooth wireless technology. Bluetooth technology provides a wireless link between a bluetooth mobile phone or bluetooth music player and the hyundai bluetooth radio.

The bluetooth radio features a hands-free system so that you may talk on the telephone without taking your eyes off the road or your hands off the wheel. A microphone built into the front of the radio receives your voice and the calling party can be heard through the car speakers.

Additionally, a bluetooth music player can be wirelessly connected to be the bluetooth radio and playback music tracks in high quality sound through the speakers. Some bluetooth mobile phones include a music player and can provide both hands-free calling and music playback. Check your mobile phone owner's manual for details.

- \* When the starting switch is in the ON position, the bluetooth radio is on standby to connect with your mobile phone even if the radio is switched off. The machine battery may therefore become drained if the ignition switch remains in the ON position for an extended period of time.
- Bluetooth technology uses low power radio transmission to connect to your bluetooth mobile phone or bluetooth music player. As radio signal strength reduces over distance, the quality of sound performance during phone calls and music playback may become poor if the distance between the radio and device widens. It is recommended that the mobile phone or music player is kept inside the cab for best results.
- \* As a bluetooth wireless connection can extend to 10 meters, your bluetooth device may automatically connect to the bluetooth radio even if the device is not in the machine.
- \* The bluetooth radio uses the latest digital noise & echo suppression system to provide the best sound clarity with little or no distortion, but in some conditions there may be some echo and noise experienced. It is recommended to keep the car windows closed during hands-free calls for best results.

## ① Bluetooth indicator

The bluetooth logo is displayed when a bluetooth device is connected, and not displayed, when no bluetooth device is connected. If the bluetooth mobile phone is connected but the connection is not of satisfactory quality, the bluetooth logo is not displayed.

#### 2 Battery strength indicator

This is an indication of your mobile phone battery condition. If your mobile phone is not unable to transmit battery condition level, the indicator is not displayed.

## ③ Single level indicator

This is an indication of the mobile phone network signal strength in your current location. If your mobile phone is not able to transmit signal level, the indicator is not displayed.

## (2) Bluetooth function

## ① Registering a bluetooth mobile phone or music player

A bluetooth connection must first be established between your bluetooth mobile phone or bluetooth music player and the bluetooth radio. The first step to connecting the bluetooth radio and bluetooth device is to introduce or "Pair" the bluetooth radio and bluetooth device together.

It is recommended that you have the instruction manual for your bluetooth mobile phone or music player with you during the pairing process described below to understand how to set your device to pair with the bluetooth radio.

\* It is recommended that all other bluetooth devices other than mobile phones are switched off during the registration or pairing process.

## a. Connection method

- a) Press button 50 for 2 seconds in any mode, **PAIRING** appears on the bluetooth radio display.
- b) Browse your mobile phone or music player menu to find the **SETTINGS** or **CONNECTIVITY** section to find the bluetooth connection section.
- c) Find the command that may be called search for bluetooth device or discovery mode so that your bluetooth device can locate all the bluetooth devices within range that may be connected.
- d) After the search is complete, **HHI AUDIO** should appear on your mobile phone or music player screen.
- e) Select **CONNECT** or **SELECT** on your mobile phone or music player.
- f) The mobile phone or music player should now prompt you top enter a PIN code. Enter 0000 into your bluetooth device and select OK.
- g) The mobile phone or music player should confirm that it has established a new paired connection with the bluetooth radio.
- h) The connecting process is now complete.
- i) If the connecting process is successful, the bluetooth logo appears on the radio display and paired phone name (e.g. Samsung or Nokia) and CONNECTED appear on the display for 2 seconds.
- j) Your bluetooth device is now ready for use with the bluetooth radio.
- k) If the pairing failed, **FAIL** appears on the bluetooth radio display.
- \* (a) The bluetooth radio allows a maximum of 6 bluetooth devices to be paired.
  - (b) Bluetooth technology only allows one phone to be connected to your bluetooth radio at one time.
  - (c) If a bluetooth music player is to be connected together with a mobile phone, refer to the page 3-63, PLAYING MUSIC USING BLUETOOTH AUDIO.
  - (d) Bluetooth connection with a mobile phone is normally established using the Hands-Free Profile (HFP). However, in some cases, the connection may use Head Set Profile (HSP) and some functions may not be available.
  - (e) As each mobile phone or music player brand and model has a different menu structure and control names, you may need to refer to the user manual of your bluetooth device for the correct procedure to connect to another bluetooth device.
  - (f) Once the bluetooth pairing is complete, automatic connection between mobile phone and the bluetooth radio is possible whenever the starting switch is switched ON.

The mobile phone must be set to automatically connect to the bluetooth radio to allow this automatic connection.

- (9) The bluetooth radio will give connection priority to the last connected mobile phone.
- (h) It is recommended that all other bluetooth devices other than mobile phones are switched off during the registration or pairing process.

#### 2 Disconnecting a bluetooth device

If you need to disconnect your bluetooth mobile phone or music player with the bluetooth radio, follow the steps below.

- a. Press button  $\textcircled{\begin{subarray}{c} \end{subarray}}$  for 2 seconds in any mode.
- b. When the bluetooth connection is lost, bluetooth logo disappears and the previously connected device name (e.g. Samsung or Nokia) and **DISCONNECTED** appear on the display.

#### ③ Select a bluetooth device

The bluetooth radio can pair up to 6 bluetooth devices. A previously paired mobile phone or music player can be selected for connection using the method described below. Refer to the table 2-1 for examples.

Preset No.	Bluetooth device name
1	Samsung (for example)
2	Sony (for example)
3	Nokia (for example)
4	Motorola (for example)
5	EMPTY
6	EMPTY

Table 2-1

a. Press button 🔭, to select **PHONES** mode.

- b. Press SEL button. **SELECT PHONE** will appear on the display.
- c. Turn , until **SELECT PHONE** is displayed.
- d. When **SELECT PHONE** appears on the display, press SEL button.
- e. Press the preset button to display the name of the bluetooth device name of the mobile phones or music players previously paired. You may also turn to display the paired devices.
  - Each time you turn ), the LCD displays as follows :

 $1\_SAMSUNG \rightarrow 2\_SONY \rightarrow 3\_NOKIA \rightarrow 4\_MOTOROLA \rightarrow BACK$ 

- f. If the bluetooth mobile phone name is Samsung as in the example of table 2-1, then **Samsung** appears on the display. When preset button is pressed or knob is turned 1 click to the right.
- g. Once the name of the bluetooth device you wish to connect is displayed, in this example **Samsung**, press SEL button to have the Samsung device connected.
- h. If the connection is successful, the bluetooth logo appears on the display and paired phone name **Samsung** and **CONNECTED** appears on the display for 2 seconds.

#### ④ Deleting a previously paired bluetooth device

If you no longer need to use a paired bluetooth device with the bluetooth radio, it can be deleted. It is from the registration assignment for another mobile phone. Refer to the example of paired devices shown table 2-1.

- a. Press knob 🛅 , to select **PHONES** mode.
- b. Press SEL button and **SELECT PHONE** appears on the display.
- c. Turn , until **DELETE PHONE** is displayed.
- d. When **DELETE PHONE** appears on the display, press SEL button.
- e. Press the preset button to display the name of the bluetooth device name of the mobile phones or music players previously paired. You may also turn like to display the paired devices.
- f. Once the name of the bluetooth device you wish to delete is displayed, in this example **Samsung**, press SEL button to have the Samsung device deleted.
- g. The display will then show DELETE NO or if knob 
  is turned, DELETE OK on the display.
- h. To confirm your wish to delete the selected device, when **DELETE OK** appears on the display press SEL button.
- i. If the bluetooth device being deleted (in this example) was connected, the display will show **DISCONNECTED (Samsung)**.
- j. In the example above, the number of paired devices is now reduced to 3, leaving 3 vacant memory locations for additional devices. Table 2-2 shows the example.

Preset No.	Bluetooth device name
1	Sony (for example)
2	Nokia (for example)
3	Motorola (for example)
4	EMPTY
5	EMPTY
6	EMPTY

Table 2-2

#### **5** Basic telephone operation

#### a. Using the bluetooth radio for hands-free calls

- a) When an INCOMING call arrives at the bluetooth radio via your connected bluetooth mobile phone, INCOMING CALL appears on the display for 3 seconds then the calling telephone number is shown.
- b) Press button 😇 to answer the INCOMING call. HANDSFREE appears on the display.
- c) To end the call, press button 🐻 and the call will end and END CALL is displayed.
- d) If you wish to reject an INCOMING call, press button  $\fbox$ .
- e) To make an OUTGOING call use the keypad of the connected bluetooth mobile phone to enter a number and press the OFF-HOOK button on your mobile phone.
- f) OUTGOING CALL is displayed on the bluetooth radio and the call continues in hands-free mode.
- g) The call can be ended by pressing button 😇 the **ON-HOOK** button of the connected mobile phone.
- \* Some mobile phones may not reject an INCOMING call using the action of d) above. In this case, press the **ON-HOOK** button on the connected mobile phone to reject.

#### b. Last call number redials

Select **BLUETOOTH** mode by pressing button 🔭 . To making a call to the last dialed number, press button 🔭 again. **OUTGOING CALL** appears on the radio display for 1 second.

\* Some mobile phones may require an additional press of button 50 to start the last number redial call.

## c. Switching to private (headset) mode during a call

During an INCOMING or OUTGOING call started in hands-free mode, it is possible to switch to the private call mode using the mobile phone handset to speak and to hear the calling party in private.

a) Press button button button the conversation ; **PRIVATE** appears on the display.

- **b)** To switch back to hands-free mode using the bluetooth radio, press button 🔭 again during the private conversation ; **HANDSFREE** is shown on the display and hands-free call operation continues.
- \* The above switching function may cause disconnection of the bluetooth link between the bluetooth radio and some mobile phones.

If button 📷 is pressed during the private conversation, the bluetooth connection will return automatically.

#### (3) Funtion of bluetooth audio player

#### Playing music using bluetooth audio

The bluetooth radio supports the bluetooth profile Audio Advanced Distribution Profile (A2DP). If your mobile phone or music player supports this profile then it is possible to listen to music tracks located on your bluetooth device through the bluetooth radio and speakers.

Additionally, the bluetooth radio supports the Audio Video Remote Control Profile (AVRCP).

If your bluetooth mobile phone or music player supports this profile then it is possible to advance to the next track or replay previous tracks on using the buttons on the front of the bluetooth radio your machine.

- a. Press MODE button until **BT AUDIO** is displayed.
- b. When **BT AUDIO** appears on the display, select the music player feature on your bluetooth device. And then bluetooth device play automatically to begin playback.
- c. To pauses the bluetooth audio playback, press SEL button for 2 seconds. Press the knob again for 2 seconds to resume playback.
- d. Press buttons (, ) advance to the next or previous music track.
- \* (a) Check your bluetooth device owner's manual for details of how to play music tracks via an external bluetooth audio system such as the bluetooth radio.
  - (b) Some bluetooth mobile phones cannot play music at all or may play music tracks in low-quality audio through the bluetooth radio.
  - (c) Some mobile phones require additional pairing to allow bluetooth audio playback.
  - (d) Information about songs (e.g. the elapsed playing time, song titles, song index, etc.) playing using bluetooth audio profile cannot be displayed on this bluetooth radio.

## $\ensuremath{\textcircled{O}}$ Connecting a bluetooth music player and mobile phone simultaneously

It is possible to connect a bluetooth mobile phone and a separate bluetooth music player to the bluetooth radio at the same time. Phone calls can be sent and received using the hands-free feature while music is playing using the bluetooth audio feature.

#### (4) Bluetooth setting

#### ① Setting the automatic call answer feature

If this function is selected, the bluetooth radio automatically answers all INCOMING calls. This feature enhances safety as the driver does not need to take their hands from the steering wheel to accept an INCOMING call.

Note that this feature cannot be set at different settings for each of the paired mobile phones.

#### a. Press button , **PHONES** is displayed.

b. Turn ountil SETTINGS is displayed.

ANSWER OFF → ANSWER 5 SECS → ANSWER 10 SEC → RETURN

#### c. Press SEL button until AUTO ANSWER is displayed.

- d. Press SEL button and turn 🔘 . The LCD then displays as follows :
  - $\cdot$  ANSWER OFF = Automatic answer function is not active.
  - $\cdot$  ANSWER 5 SEC = Automatic answers all INCOMING calls after a 5 second delay.
  - · ANSWER 10 SEC = Automatic answers all INCOMING calls after a 10second delay.
  - $\cdot$  RETURN = Return to previous menu.
- e. After making your selection, press SEL button to store the selection.
- f. SETTINGS is then displayed for adjustment if required.
- g. If you do not wish to adjust any further bluetooth settings, press button •••• to return to the last selected mode.

#### ② Setting calling voice volume

This function is to set the level of the mobile phone's calling voice volume to be heard through the bluetooth radio and speakers.

- a. Follow steps a. to c. of above setting below  $\bigcirc$ .
- b. When **VOICE VOL** appears on the display, press SEL button to display the current level of the calling voice. Turn 
  right or left to adjust the calling voice volume as desired. This is the level the calling voice volume will be set to each time the bluetooth radio is used after the stating switch is turned off and then on again.
- c. After making your selection, press SEL button to store the selection.
- d. SETTINGS is then displayed for adjustment if required.
- e. If you do not wish to adjust any further bluetooth settings, press button 👸 to return to the last selected mode.

#### ③ Setting the ring volume

This function is to set the level of the mobile phones ring tone volume to be heard through the bluetooth radio and speakers.

- a. After making your selection, press SEL button to store the selection.
- b. When **RING VOL** appears on the display, press the SEL button to display the current level of the ring tone. Turn pright or left to adjust the ring tone volume as desired. This is the level the ringer volume will be set to each time the bluetooth radio is used after the starting switch is turned off and then on again.
- c. After making your selection, press SEL button to store the selection.
- d. The press button 👸 to return to the last selected mode.

#### GENERAL

#### (1) Power and volume button

## ① Power ON / OFF button

Press power button (1) to turn the unit on or off.

## ② Volume UP/DOWN control knob

Turn VOL knob (1) right to increase the volume level. Turn VOL knob (1) left to decrease the volume. After 5 seconds the display will return to the previous display mode.

## ③ Initial volume level set up

I-VOL is the volume level the unit will play at when next turned on. To adjust the I-VOL level, press and hold VOL button (1) for longer than 2 seconds. The current volume level displays on the display panel.

Then turn button (1) right or left to set the volume level as the I-VOL level.

## ④ Clock ON/OFF control

The CLOCK was default at off status. To turn CLOCK ON, press and hold VOL button (1) for longer than 2 seconds to display I-VOL, then short press VOL again, turn VOL knob while CLOCK OFF display, then the CLOCK ON will be displayed.

\* Due to time tolerance, the clock display on the Audio unit might have little difference.

## **5 Clock adjustment**

With CLOCK ON selected, press VOL knob again after CLOCK ON display, the hour will blink, turn VOL knob right or left to adjust hour. Simply press VOL again, the minute will blink, turn VOL knob to adjust minute. Then press VOL again to confirm the clock once finished.

#### (2) Menu Selection

This button can adjust the sound effect and other things.
 Each time you press this button (2), LCD displays as follows :

BAS  $\rightarrow$  TREB  $\rightarrow$  BAL L=R  $\rightarrow$  FAD F=R  $\rightarrow$  EQ  $\rightarrow$  LOUD ON  $\rightarrow$ BEEP 2ND

On each setting, the level can be controlled by turning TUNE knob (2). When the last adjustment is made, after 5 seconds, the display will automatically return to the previous display mode.

#### ② Bass control

To adjust the bass tone level, first select the bass mode by pressing SEL button (2) repeatedly until BASS appears on the display panel. Then turn knob (2) right or left within 5 seconds to adjust the bass level as desired. The bass level will be shown on the display panel from a minimum of BASS-7 to a maximum of BASS+7.

#### ③ Treble control

To adjust the treble tone level, first select the treble mode by pressing SEL button (2) repeatedly until TREB appears on the display panel. Then turn knob (2) right or left within 5 seconds to adjust the treble level as desired. The treble level will be shown on the display panel from a minimum of TREB -7 to a maximum of TREB +7.

#### ④ Balance control

To adjust the left-right speaker balance, first select the balance mode by pressing SEL button (2) repeatedly until BAL indication appears on the display panel. Then turn knob (2) right or left within 5 seconds to adjust the balance as desired. The balance position will be shown by the bars on the display panel from BAL 10R (full right) to BAL 10L (full left).

#### **5** Fader control

To adjust the front-rear speaker balance, first select the fader mode by pressing SEL button (2) repeatedly until FADER indication appears on the display panel. Then turn knob (2) right or left within 5 seconds to adjust the front-rear speaker level as desired. The fader position will be shown by the bars on the display panel from FAD 10F (full front) to FAD 10R (full rear).

#### 6 EQ control

You can select an equalizer curve for 4 music types (CLASSIC, POP, ROCK, JAZZ). Press button (2) until EQ is displayed, then turn knob (2) right or left to select the desired equalizer curve. Each time you turn the knob, LCD displays as follows :

 $\mathsf{EQ}\:\mathsf{OFF}\to\mathsf{CLASSIC}\to\mathsf{POP}\to\mathsf{ROCK}\to\mathsf{JAZZ}$ 

When the EQ mode is activated, the BASS and TREBLE modes are not displayed.

#### ⑦ Loud control

When listening to music at low volume levels, this feature will boost the bass and treble response. This action will compensate for the reduction in bass and treble performance experienced at low volume.

To select the loudness feature, press button (2) until LOUD is displayed, then turn knob (2) right or left to activate or deactivate loudness.

#### 8 Beep control

To adjust the BEEP mode, first select the BEEP mode by pressing button (2) repeatedly until BEEP indication appears on the display panel. Then turn knob (2) left or right within 5 seconds to select BEEP 2ND, BEEP OFF or BEEP ON.

- BEEP 2ND : You will only hear the beep sound when the buttons are held down for more than 2 seconds.
- BEEP OFF : You can not hear the sound beep when you press the buttons.
- BEEP ON : You can hear the beep sound each time you press the buttons.

## (3) Mute control

① Press and hold MUTE button (3) for over 2 seconds to mute sound output and MUTE ON will blink on the LCD. Press the button again to cancel MUTE function and resume to normal playing mode.

## (4) Mode selection

- ① Repeat press MODE button (3) to switch between FM1, FM2, AM, USB, AUX, BT MUSIC.
- \* If there is no USB, AUX, Bluetooth Phone connected, it would not display USB, AUX, BT when you press button (3).

# RADIO

## (1) Mode button

1 Repeat press MODE button to select FM1, FM2 or AM.

# (2) Manual tuning button

① To manually tune to a radio station, simply turn encoder TUNE (2) left or right to increase or decrease the radio frequency.

## (3) Auto tuning button

① To automatically select a radio station, simply press Seek up or Track down button.

## (4) Station preset button

- In radio mode, pressing buttons (6) to (11) will recall the radio stations that are memorized. To store desired stations into any of the 6 preset memories, in either the AM or FM bands, use the following procedure :
  - a. Select the desired station.
  - b. Press and hold one of the preset buttons for more than 2 seconds to store the current station into preset memory. Six stations can be memorized on each of FM1, FM2, and AM.

## (5) Preset scan (PS) / Best station memory (BSM) button

① Press BSM button (12) momentarily to scan the 6 preset stations stored in the selected band. When you hear your desired station, press it again to listen to it.

Press BSM button (12) for longer than 2 seconds to activate the Best Station Memory feature which will automatically scan and enter each station into memory.

If you have already set the preset memories to your favorite stations, activating the BSM tuning feature will erase those stations and enter into the new ones. This BSM feature is most useful when travelling in a new area where you are not familiar with the local stations.

# USB PLAYER

## (1) USB playback

① The unit was equipped with a front USB jack and also a rear USB Jack.

With a USB device plugged in the front USB jack, it will be detected as front USB mode. And with a USB device plugged in the rear USB jack, it will be detected as rear USB. To get to a USB mode, press MODE (3) button momentarily or insert the USB device in front or rear USB jack.

\* If no mp3 or wma files in USB device, it will convert to the previous mode after display NO FILE.

#### (2) Track Up / Down button

① Press SEEK up (13) or TRACK down (14) to select the next or previous track. Press and hold the buttons to advance the track rapidly in the forward or backward direction.

## (3) MP3 directory / File searching

 Button (2) is used to select a particular directory and file in the device. Turn button (2) right or left to display the available directories. Press button (2) momentarily when the desired directory is displayed, then turn button (2) right or left again to display the tracks in that directory. Press button (2) to begin playback when the desired file is displayed.

## (4) Directory Up / Down button

- ① During MP3/WMA playback, simply press DIR- button (10) to select the previous directory (if available in the device); simply press DIR+ button (11) to select the next directory (if available in the device).
- If the USB device does not contain directories, it would play MP3/WMA tracks at 10- file when you press DIR- button (10), and play MP3/WMA tracks at 10+ file when you press DIR+ (11) button.

# (5) Track Scan Play (SCAN) button

- SCAN playback : Simply press SCAN (12) button to play the first 10 seconds of each track.
- SCAN folder : Press and hold SCAN button for longer than 2 seconds to scan play the tracks in current folder.
- SCAN off : Simply press it again to cancel SCAN feature.

## (6) Track Repeat Play (RPT) button

- REPEAT playback : Simply press RPT (8) button to play current track repeatedly.
- REPEAT folder : Press and hold RPT for longer than 2 seconds to repeat play the tracks in current folder.
- REPEAT off : Simply press it again to cancel REPEAT feature.

## (7) Track Random Play (RDM) button

## (8) ID3 v2 (DISP)

- RANDOM playback : Simply press RDM (9) button to play the tracks in the device in a random sequence.
- RANDOM folder : Press and hold RDM button for longer than 2 seconds to random play the tracks in current folder.
- RANDOM off : Simply press it again to cancel RANDOM feature.
- While a MP3 file is playing, press DISP button (6) to display ID3 information. Repeat push DISP button (6) to show directory name / file name and album name / performer / title.
- \* If the MP3 disc does not have any ID3 information, it will show NO ID3.
- \* USB Information and Notice
  - a. Playback FILE SYSTEM and condition allowance.
    - FAT, FAT12, FAT16 and FAT32 in the file system.
    - V1.1, V2.2 and V2.3 in the TAG (ID3) version.
  - b. Display up to 32 characters in the LCD display.
  - c. No support any of MULTI-CAED Reader.
  - d. No high speed playback but only playing with normal full speed.
  - \* DRM files in the USB may cause malfunction to playback in the radio unit.
  - \* The temperature below -10 Celsius, the audio unit with USB hook up would be affected to play well.

## AUX OPERATION

It is possible to connect your portable media player to the audio system for playback of the audio tracks via the cab speakers.

To get the best results when connecting the portable media to the audio system, follow these steps :

- Use a 3.5 mm stereo plug cable to connect the media player headphone socket at each end as follows.
- Adjust the portable media player to approximately 3/4 volume and start playback.
- Press the MODE button (3) on the audio unit to change into AUX mode.
- The volume and tone can now be adjusted on the audio unit to the desired level.
- \* The audio quality of your media player and the audio tracks on it may not be of the same sound quality as the audio system is CD Player.
- \* If the sound of the media player is too low compared with the radio or CD, increase the volume of the player.
- \* If the sound of the media player is too loud and/or distorted, decrease the volume of the player.
- \* When in AUX mode, only the Volume, Bass, Treble, EQ and Mode functions of the audio unit can be used.

# BLUETOOTH (if equipped)

#### 1) Using a bluetooth wireless connection

- (1) Your audio unit supports bluetooth wireless technology. You can set up a wireless link with bluetooth cellular phone.
- (2) Keep PAIRING the cellular phone with audio unit in a few minutes as the phone are being switched on well enough.
- \* Since this audio unit is on standby to connect with your cellular phone via bluetooth wireless technology, using this audio unit without running the engine can result battery drainage.
- $\ast\,$  This audio unit phone call reception is on standby when ignition switch is set to ACC OFF or ON.
- \* The line-of-sight distance between this audio unit and your cellular phone must be 10 meters or less for sending and receiving voice and data via bluetooth wireless technology. However the transmission distance may become shorter than the estimated distance depending on the environment in use.
- \* Digital Noise & Echo suppression system provides the best sound clarity with little or no distortion (Echo & side tone will happen depending on cellular phone or service network).
- \* To ensure the quality of calling, you should select a proper bluetooth VR level. This audio unit has already set with the best bluetooth VR level.

#### 1) Bluetooth icon

It will blink while establishing the bluetooth pairing. It will light after a bluetooth device connected.

② Battery icon

It indicates the battery status of the connected bluetooth device.

## ③ Single strength icon

It indicates the signal strength of the connected bluetooth device.
### 2) Pairing in hands free modes

- (1) Press and hold CALL button (4) for 2 seconds until you hear beep sound, then appears PAIR STR on the display.
- (2) For the next procedure, go to cellular phone pairing mode.
- (3) If it is in pairing status with audio unit and cellular phone, PAIRING will show on the display.
- (4) If you want to exit pairing mode, press CALL END button (5) briefly while pairing, then it will show PAIR CLR on the display.
- (5) Bluetooth Icon and PAIR OK appear on the display when pairing is successful.

#### 3) Cellular phone pairing mode

- (1) Browse your cellular phone menu and find the connectivity or bluetooth connection section.
- (2) Select search for a new handsfree device function and allow the phone to find the mobile.
- (3) HYUNDAI should appear on your cellular phone screen.
- (4) Press connect menu among the handsfree option on your cellular phone.
- (5) The cellular phone should prompt for a pin code. Insert the pin code 1234.
- (6) The cellular phone should confirm that it has established a new paired connection.
- (7) Close the menu. The pairing is now completed. It appears PAIR FAIL on the display for 3 seconds.
- \* Each cellular phone type has distinct phone menu so you may need to refer to your manufactures instruction for the correct procedure on how to connect a new bluetooth device.
- \* Please retry to the pairing instruction if HYUNDAI does not appear on the cellular phone screen.
- \* Please select authorized, if there is authorized menu in the menu of bluetooth connection in your cellular phone.
- \* Once the bluetooth pairing is completed between your cellular pone and this audio unit, the both units will be automatically recognized on its paring and when you turn on the key in your car even though this audio unit is turned off.
- \* This audio unit can store up to 6 phones pairings. If the memory is full, the first stored paired phone will be deleted.
- \* The connecting priority will be given to the last connected cellular phone.
- \* If you want to change the connecting priority, try to connect this audio unit from the cellular phone.

## 4) Bluetooth connection and disconnection

- (1) When established bluetooth connection between this audio unit and the cellular phone, bluetooth icon on the display appears and then the display shows HF/AV CONN when handsfree & AV profile connected.
- (2) To disconnect bluetooth link

Press and hold CALL END button (4) for 2 seconds, it shows DIS CON and disappears bluetooth Icon on the display.

(3) To disconnect bluetooth link

Press CALL button (3) briefly, it blinks bluetooth Icon on the display while bluetooth is being connected. If the connection is completed, it appears bluetooth Icon on the display.

- When your cellular phone battery is at low charge, the bluetooth connection may occasionally be lost. To maintain good connectivity ensure that your phone battery is adequately charged.
- \* In case of failure of bluetooth pairing :
  - Delete item in paired list on your phone.
  - Reset both phone by power off/on and the audio unit by ACC off/ on.
- \* Connecting priority of handsfree profile is higher than headset profile.
- \* The headset mode does not support caller ID, reject call and call Transfer.

### 5) Using the audio unit as a handsfree device

(1) When the audio unit is ringing, it shows CALL and follows with the phone number \*\*\*\*\*\*\*\*\* on the display.

(2) To accept call

Press CALL button (4), it appears ANSWER CALL and follows TALKING on the display.

(3) To end call

To end call, press CALL END button (5), it appears REJECT on the display.

\* If reject call is activated in your phone, then your cellular phone does not support reject call function.

## 6) Audio transfer between the audio unit and phone

The audio transfer function is for switching the call from the audio unit to the cellular phone for private conversation.

- Press CALL button (4) briefly during conversation, it appears CALL TRANS on the display. To switch back to the audio unit, press button
   briefly during private conversation, then it appears CALL TRANS on the display again.
- \* This function will be a cause of disconnection of bluetooth link in some nokia phones, but you do not worry just press button (4) during private conversation, then switch back to the audio unit automatically.
- \* The quality of calling between cellular phone and audio unit is better than calling between one audio unit and another one.

# 7) Last call number dialing

(1) Press CALL button (4) briefly, it appears CALL TO, then simply press CALL button once again, it would make the last call with phone number display on LCD.

If Reject call is activated in your phone, then your cellular phone does not support Reject Call function.

If you are using SAMSUNG phone, then you may need to press once more send button. First press button shows phone contact list in your phone, then second press make the last call.

### 8) To make a call by cellular phone

The audio transfer function is for switching the call from the audio unit to the cellular phone for private conversation.

- (1) The audio unit activated automatically when you make a call by cellular phone.
- (2) When you make a call processing by cellular phone, it shows CALLING on the display.
- (3) When you receive a call, the phone number \*\*\*\*\*\*\*\* appears on the display.

#### 9) Using the audio unit as bluetooth music

The audio unit supports A2DP (Audio Advanced Distribution Profile) and AVRCP (Audio Video Remote Control Profile), and both profiles are available to listen music at the audio unit via cellular phone which is supporting the two profiles above.

- (1) To play music, search the menu on your cellular phone as below :
  i.e : Menu → File manager → Music → Option → Play via bluetooth.
  It appears BT MP3 on the display.
- (2) During BT MP3 playing, you could select the previous or next track by pressing SEEK up or TRACK down button on audio unit or operate via your cellular phone.
- (3) To stop music, press button (5) briefly and it will automatically switch into the previous mode.
- (4) To resume music playing, press the play button on your cellular phone.
- \* This function maybe different depends on cellular phone. Please follow the cellular phone menu. Some kinds of phone need to pair once more for bluetooth MP3 connection.
- \* This function will be caused to disconnect A2DP, AVRCP depends on cellular phone.
- \* Information about songs (e.g.: the elapsed playing time, song title, song index, etc.) cannot be displayed on this audio unit.

### ■ RESET AND PRECAUTIONS

#### 1) Reset function

Interfere noise or abnormal compressed files in the MP3 disc or USB instrument may cause extraordinary operation (or unit frozen/locking up). It's strongly recommended to use appropriate USB storage not cause any malfunction to the audio unit. In the unlikely event that the player fails to operate correctly, try out to reset unit by any of following two methods.

(1) press and hold

simultaneously for about 5 seconds. (without Bluetooth)

Press and hold SIME simultaneously for about 5 seconds. (with Bluetooth)

- (2) Take out the fuse for the audio system in the vehicle once and then plug again.
- \* It will be necessary to re-enter the radio preset memories as these will have been erased when the microprocessor was reset.

After resetting the player, ensure all functions are operation correctly.

#### 2) Precautions

When the inside of the car is very cold and the player is used soon after switching on the heater, moisture may form on the disc or the optical parts of the player and proper playback may not be possible.

If moisture forms on the optical parts of the player, do not use the player for about one hour. The condensation will disappear naturally allowing normal operation.

- (1) Operation voltage : 9~32 volts DC, negative
- (2) Output power : 40 watts maximum (20 watts x 2 channels)
- (3) Tuning range

Area	Band	Frequency range	Step
USA	FM	87.5~107.9 MHZ	200K
	AM	530~1710 KHZ	10K
EUROPE	FM	87.5~108.0 MHZ	50K
	AM	522~1620 KHZ	9K
ASIA	FM	87.5~108.0 MHZ	100K
	AM	531~1602 KHZ	9K
LATIN	FM	87.5~107.9 MHZ	100K
	AM	530~1710 KHZ	10K

- AREA Selection :
  - To select an area, press and hold related buttons at FM1 band for about 3 seconds.
