

3. SWITCHES

1407A3CD04

1) STARTING SWITCH

(1) There are three positions, OFF, ON and START.

- ○ (OFF) : None of electrical circuits activate.
- | (ON) : All the systems of machine operate.
- ◯ (START) : Use when starting the engine.

Release key immediately after starting.

- ※ If you turn ON the starting switch in cold weather, the fuel warmer is automatically operated to heat the fuel by sensing the coolant temperature. Start the engine in 1~2 minutes after turning ON the starting switch. More time may take according to ambient temperature.
- ※ Key must be in the ON position with engine running to maintain electrical and hydraulic function and prevent serious machine damage.

2) MASTER SWITCH

- (1) This switch is used to shut off the entire electrical system.
 - (2) I : The battery remains connected to the electrical system.
O : The battery is disconnected to the electrical system.
- ※ **Never turn the master switch to O(OFF) with the engine running. Engine and electrical system damage could result.**

3) ACCEL DIAL SWITCH

- (1) There are 10 dial setting.
- (2) Setting 1 is low idle(Turtle) and setting 10 is high idle(Rabbit).
 - By rotating the accel dial to right : Engine speed increases
 - By rotating the accel dial to left : Engine speed decreases

4) MAIN LIGHT SWITCH

- (1) This switch use to operates the head light and work light by two step.
 - First step : Head light comes ON.
 - Second step : Work light comes ON.

5) WIPER SWITCH

- (1) This switch use to operates wiper and washer by two step.
 - First step : The wiper operates(Intermittent)
 - Second step : The wiper operates(Low speed)
- ※ **Wiper motor doesn't operate with front sliding door open.**
- ※ **If wiper does not operate with the switch in the ON position, turn the switch off immediately. Check the cause. If the switch remains ON, motor failure can result.**

6) WASHER SWITCH

- (1) The washer liquid is sprayed and the wiper is operated only while pressing this switch.
- (2) The indicator lamp is turned ON when operating this switch.

7) PREHEAT SWITCH

- (1) This switch is used for starting the engine in cold weather. If pressed, preheated the intake air to get easier engine starting.
※ **Never hold the push button switch in for more than 5 seconds, as this can damage the electric valve solenoid.**
- (2) The indicator lamp is turned ON when operating this switch.

8) TRAVEL ALARM STOP SWITCH

- (1) This switch is the signal to alarm surrounding when the machine travels to forward and backward.
- (2) On pressing this switch, the alarm operates only when the machine is traveling.

9) CAB LIGHT SWITCH(Option)

- (1) This switch turns ON the cab light on the cab.

10) OVERLOAD SWITCH

- (1) When this switch turned ON, buzzer makes sound and overload warning lamp comes ON in case that the machine is overload.
- (2) When turn OFF buzzer stops and warning lamp goes out.

11) QUICK CLAMP SWITCH(Option)

- (1) This switch is use to engage or disengage the moving hook on quick clamp.
※ **Refer to the page 8-6 for details.**

12) BREAKER SELECTION SWITCH(Optional)

- (1) This switch is used to select breaker.
- ※ **The breaker operates only when this switch is selected.**

13) BEACON SWITCH(Optional)

- (1) This switch turns ON the rotary light on the cab.
- (2) The below indicator lamp is turned ON when operating this switch.

14) HEATED SEAT SWITCH(Optional)

- (1) This switch is used to heat the seat.

15) HORN SWITCH

- (1) This switch is at the top of right side control lever.
On pressing, the horn sounds.

16) BREAKER OPERATION SWITCH

- (1) On pressing this switch, the breaker operates only when the breaker selection switch on the switch panel is selected.

17) ONE TOUCH DECEL SWITCH

- (1) This switch is used to actuate the deceleration function quickly.
- (2) The engine speed is increased to previous setting value by pressing the switch again.

18) POWER MAX SWITCH

- (1) This switch activate power max function.
When this switch is kept pressed, hydraulic power of work equipment will increased approx 110 percent during 8 seconds.
 - (2) After 8 seconds, function is cancelled automatically even switch is keep pressed.
- ※ **Don not use for craning purposes.**
