

This Handbook has been prepared to support service men to maintain more quickly and correctly for excavators and wheel loaders manufactured and sold by Hyundai.

This handbook is subject to revision once a year reflecting all new machine developments and improvements in quality.

Hyundai promises to supply its customers with better products by continuous technical renovation and quality improvement.

The circuits contained in this Handbook are subject to change at any time without any advance notice.

Please do not hesitate to contact a Hyundai service center in your area if you have questions or suggestions about the products or this handbook.
