

## GROUP 2 MODE SELECTION SYSTEM

### 1. POWER MODE SELECTION SYSTEM

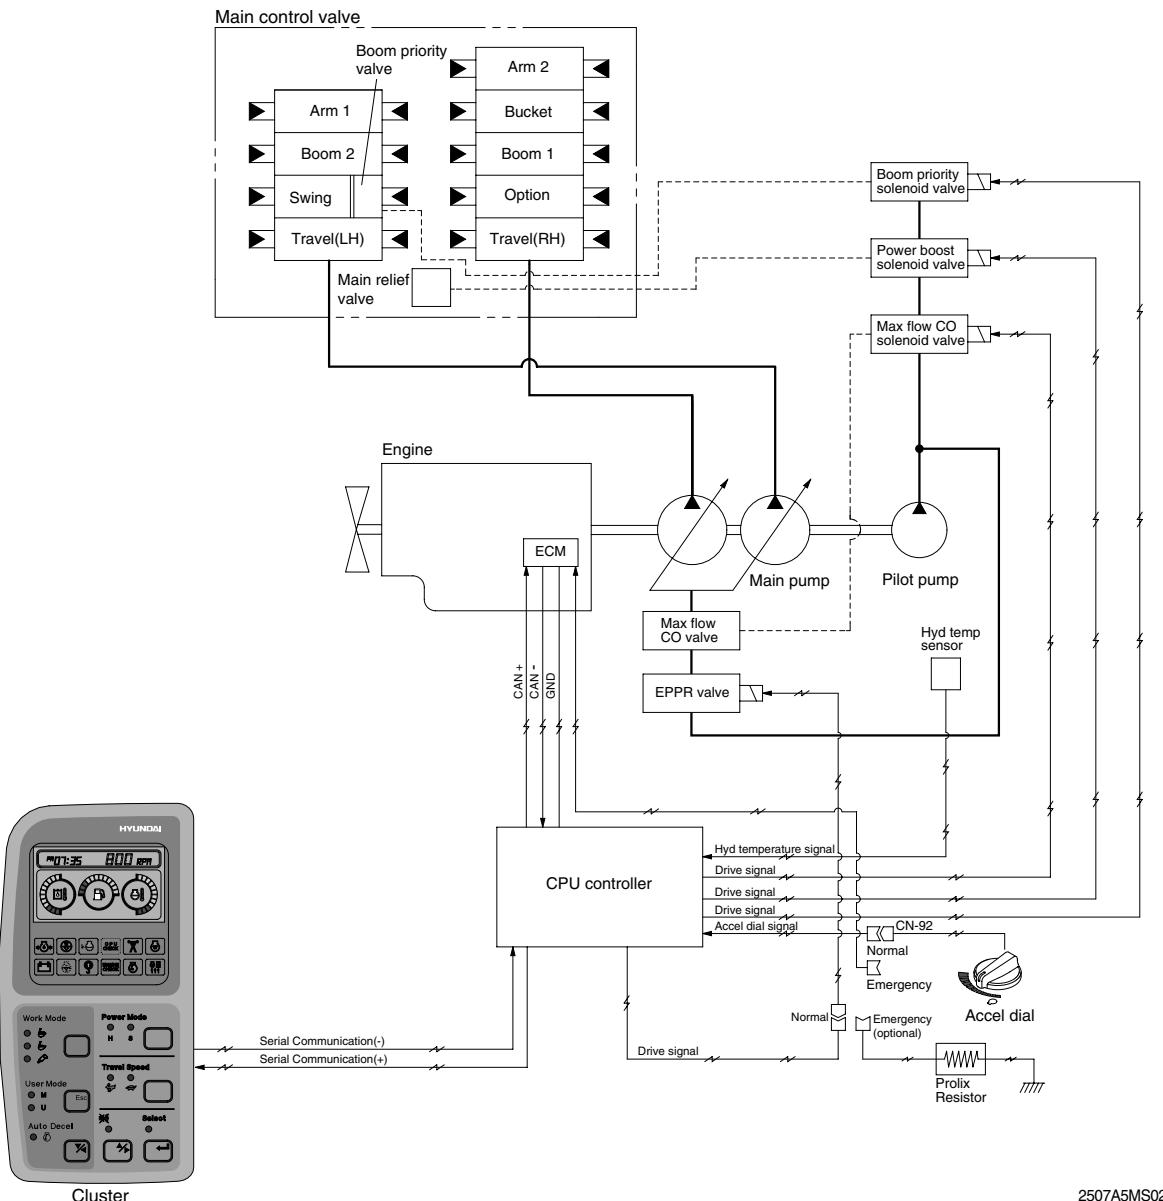

Mode selection system(Micro computer based electro-hydraulic pump and engine mutual control system) optimizes the engine and pump performance.

The combination of 2 power modes(H, S) and accel dial position(10 set) makes it possible to use the engine and pump power more effectively corresponding to the work conditions from a heavy and great power requesting work to a light and precise work.

| Mode            | Application               | Power set (%) | Engine rpm |      |            |      | Power shift by EPPR valve |                    |              |                    |
|-----------------|---------------------------|---------------|------------|------|------------|------|---------------------------|--------------------|--------------|--------------------|
|                 |                           |               | Default    |      | Other case |      | Default                   |                    | Other case   |                    |
|                 |                           |               | Unload     | Load | Unload     | Load | Current (mA)              | Pressure (kgf/cm²) | Current (mA) | Pressure (kgf/cm²) |
| M               | Maximum power             | 95            | 1950±50    | 1900 | 1950±50    | 1900 | 280±30                    | 7                  | 160±30       | 0                  |
| H               | High power                | 85            | 1850±50    | 1800 | 1950±50    | 1900 | 320±30                    | 10                 | 230±30       | 4                  |
| S               | Standard power            | 70            | 1750±50    | 1700 | 1850±50    | 1800 | 320±30                    | 10                 | 280±30       | 7                  |
| AUTO DECEL      | Engine deceleration       | -             | 1000±100   | -    | 1000±100   | -    | 700±30                    | 35                 | 700±30       | 35                 |
| One touch decel | Engine quick deceleration | -             | 850±100    | -    | 850±100    | -    | 700±30                    | 35                 | 700±30       | 35                 |
| KEY START       | Key switch start position | -             | 850±100    | -    | 850±100    | -    | 700±30                    | 35                 | 700±30       | 35                 |

## 2. WORK MODE SELECTION SYSTEM

3 work modes can be selected for the optional work speed of the machine operation.

2507A5MS02

### 1) HEAVY DUTY WORK MODE

The boom priority solenoid is activated to make the boom operation speed faster.

### 2) GENERAL WORK MODE

When key switch is turned ON, this mode is selected and swing operation speed is faster than heavy duty work mode.

### 3) BREAKER OPERATION MODE

It sets the pump flow to the optimal operation of breaker by activating the max flow cut-off solenoid.

| Work mode  | Boom priority solenoid | Max flow cut-off solenoid |
|------------|------------------------|---------------------------|
| Heavy duty | ON                     | OFF                       |
| General    | OFF                    | OFF                       |
| Breaker    | OFF                    | ON                        |

### 3. USER MODE SELECTION SYSTEM

An operator can change the engine and pump and memorize it for his preference.

| Mode | Operation  |
|------|--|
| U    | High idle rpm, auto decel rpm<br>EPPR pressure can be modulated and memorized separately |

#### HOW TO MODULATE THE MEMORY SET

- 1) Each memory mode has a initial set which are mid-range of max engine speed, auto decel rpm, and EPPR valve input current.
  - 2) High idle rpm, auto decel rpm, EPPR pressure can be modulated and memorized separately in the U-mode.
- \* Refer to the page 5-37 for set of user mode.

##### • LCD segment vs parameter setting

| Segment (■) | ACCEL (rpm) | DECCEL (rpm)    | EPPR (mA) |
|-------------|-------------|-----------------|-----------|
| 1           | 1500        | 700             | 150       |
| 2           | 1550        | 800             | 200       |
| 3           | 1600        | 850             | 250       |
| 4           | 1650        | 900             | 300       |
| 5           | 1700        | 950             | 350       |
| 6           | 1750        | Decel rpm(1000) | 400       |
| 7           | 1800        | 1050            | 450       |
| 8           | 1850        | 1100            | 500       |
| 9           | 1900        | 1150            | 550       |
| 10          | 1950        | 1200            | 600       |
